

# Client Case Study

Medical clinic

## About the Client:

- 1,813 benefit eligible employees
- 3 plan options
- Participation rate: 22%

A medical group of physicians used Decision Doc to better understand their health plan options and save money on healthcare costs.

## Employee impact

By moving to a better plan, Decision Doc users saved an average of \$2,832.

18% of Decision Doc users changed their plan compared to only 2% of non-users.

# Increased Use of High Deductible Health Plans (HDHP) and Health Savings Accounts

Decision Doc users enrolled in an HDHP **12% more** often than non-users.

Decision Doc users contributed **89%** in an HSA compared to only 80% of non-users.

Of the employees enrolled in an HSA, Decision Doc users contributed an average of **\$4,341** compared to **\$3,933** for non-users.

## Employee savings!

\$83K in aggregate total cost savings

## How we calculate results

We match Decision Doc users to a pre-and post-open enrollment census so we can accurately show the impact Decision Doc has on employee enrollment behaviors.
